

**Read
to Me!**
**Any Time,
Any Place!**

Children at every age benefit from hearing books read aloud:

Babies (0 - 12 mo.) love the sound of your voice even before they understand the words. *Rhyming books with lots of rhythm hold a baby's interest and are very comforting.*

Babies also love looking at faces. *Books with photographs of other babies or of objects are great to talk about with your little one.*

Toddlers (12 - 18 mo.) are learning new words, how to hold a book, and how to turn board book pages. *Toddlers enjoy books that relate to their own experiences.*

Youngsters (18 - 24 mo.) are beginning to notice details in the illustrations. *Youngsters can learn the names of objects you point to in books.*

2-Year-Olds have favorite books and can predict what's going to happen in a story. *Read books that describe a series of events. Ask, "What's going to happen next?"*

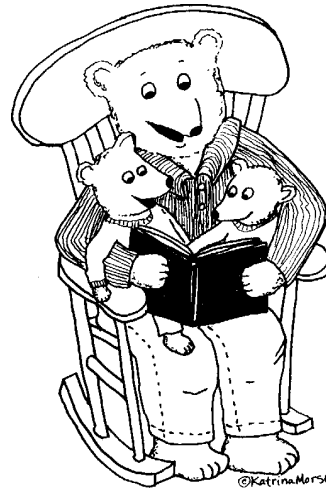

3-Year-Olds have a longer attention span and can listen to books with more words. They are also developing a sense of humor! *Pick books that keep reading fun and introduce new ideas.*

4-Year-Olds often memorize the words of their favorite book, even before they learn to read. *Ask your child to retell his or her favorite book.*

The most important reason to read to your child is to share time together.

How to Choose a Children's Book

Ask yourself these questions:

- Will my child like this book?
- Do I like the pictures? Will my child?
- Is this a book I want my child to hear?
- Is this a book I want to read again and again?

Family Reading Partnership

...a few of our favorites
